

CONVEYOR

CAPABILITIES

JARLAM

Customised conveyors to meet client requirements

High-Quality

We provide expert support in design, layouts and process flow.

Areas of Expertise

Jarlam delivers high-quality, low-maintenance conveyors designed for efficiency, longevity and durability. Using the latest Autodesk software, our engineering team customises each conveyor to meet client requirements, from single conveyors to complete production lines.

We provide expert support in design, layouts, and process flow, ensuring seamless integration. Our Australian-made conveyors are built with precision and reliable components for the food, pharmaceutical, and manufacturing industries.

All systems undergo rigorous QA testing before delivery to minimise downtime and ensure optimal performance. Additionally, our experienced installation teams offer full installation capabilities, including relocation and modification services.

FDA Approved Polyurethane Belt Conveyors

Jarlam offers high-quality PU belt conveyors for the food industry, including:

- Food grade PU conveyors (with/without tracking strips)
- Elevator and flighted conveyors (with sidewalls)
- Chevron and deck-style carryway configurations
- Knife-edge PU belt conveyors
- PU “cord” belt conveyors (ideal for product spreading)

Modular Belt Conveyors

Jarlam specialises in the design, fabrication, and installation of modular belt conveyors, including:

- Spiral conveyors (direct and side drive)
- Incline and elevator conveyors
- Pack-off and accumulation conveyors
- Radius and straight modular conveyors

Conveyor Solutions

Jarlam designs tailored conveyor solutions to suit unique process flows, product transfers, and complex conditions. Our solutions include:

- Combination belt conveyors
- Assembly conveyors
- Slat chain conveyors
- Wire belt conveyors

Enhance
your
conveyor
with
custom
add-ons for
efficiency
and safety.

Conveyor Add-ons

Jarlam offer a range of add-ons to suit our conveyors:

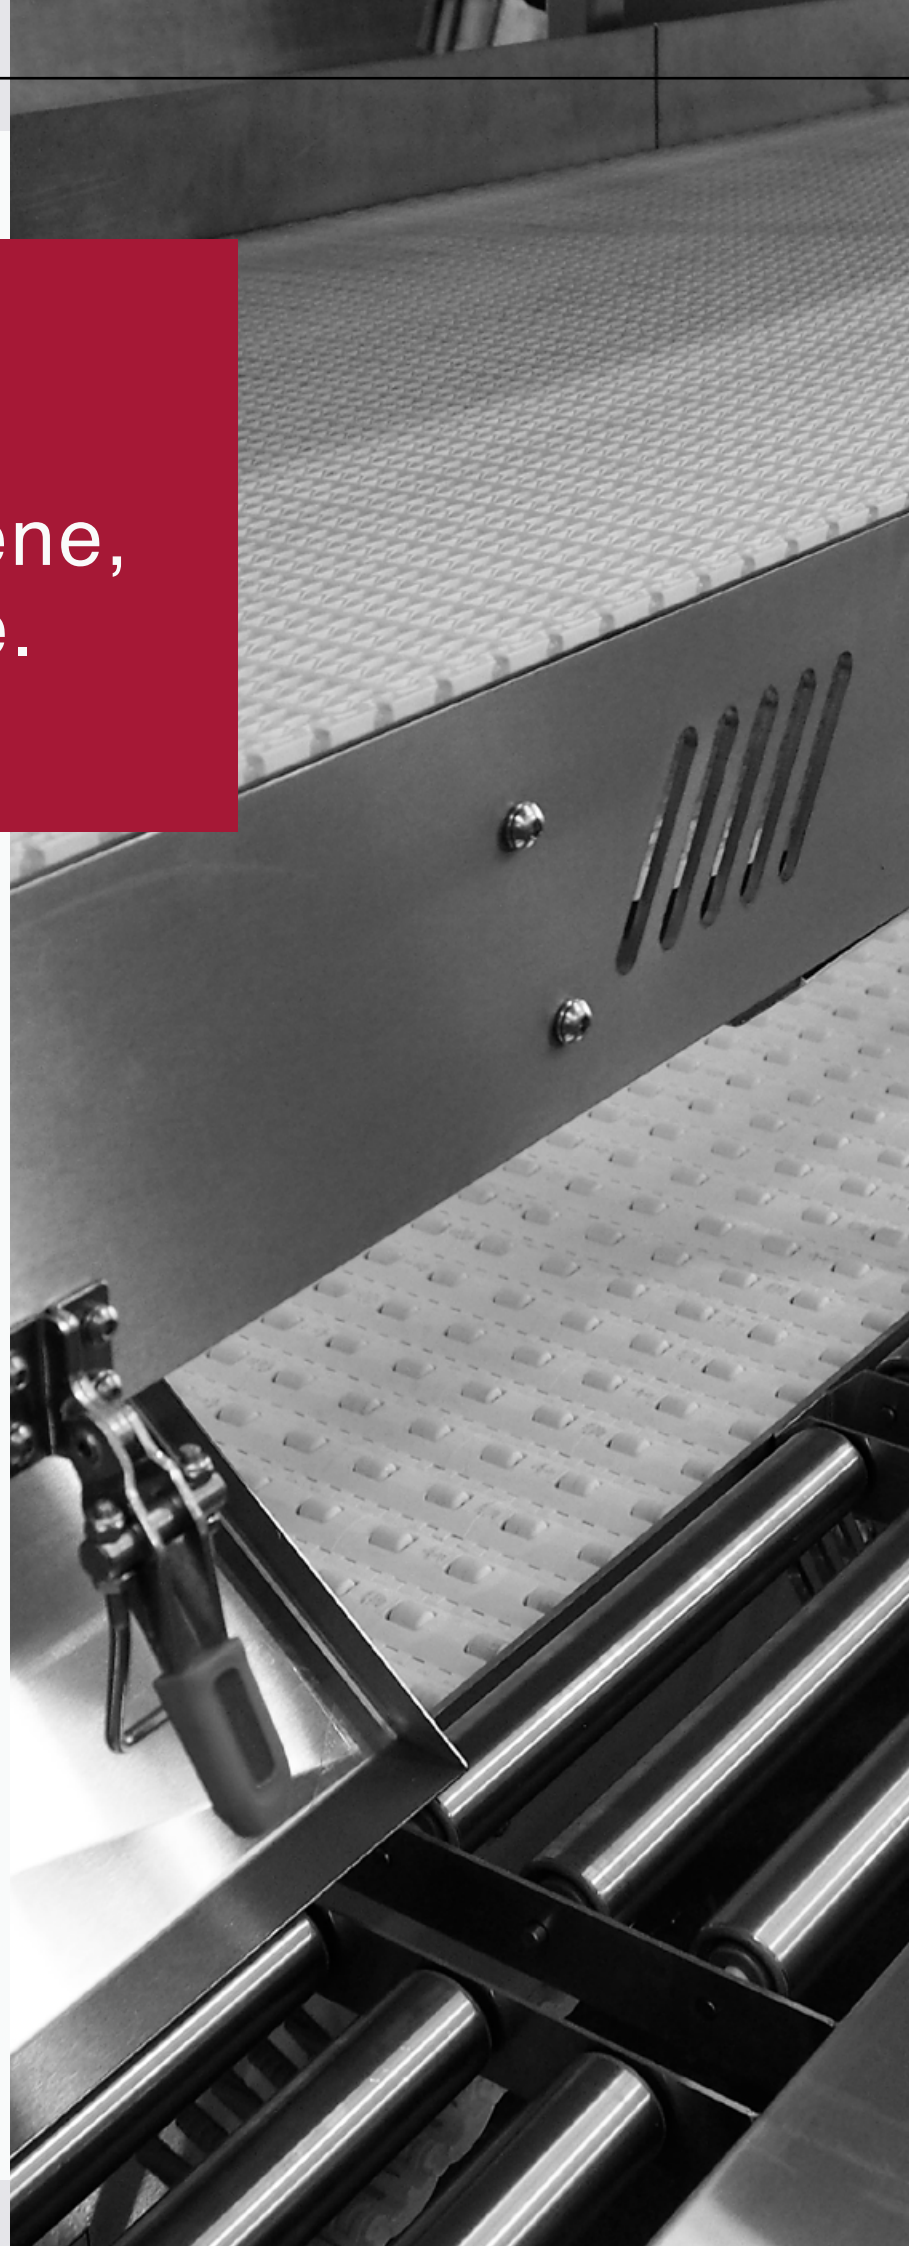

- Spraybars and CIP options
- Belt washing stations
- Product catch trays
- Scrapers
- Movimot and VSD options
- Stainless fabricated crossovers and platforms
- Safety guarding
- Custom guides / product alignment solutions
- Material loading trolleys
- Packing table / stations
- Chutes
- Hoppers
- Micro transfer solutions

Precision-built
conveyors for
durability, hygiene,
and compliance.

About Jarlam

Jarlam Australia is a Melbourne-based mechanical engineering and fabrication company with a 1000m² workshop and a team of 40+ full time team members.

We specialise in designing, fabricating, and installing high quality conveyors for the food, pharmaceutical, and packaging industries. Each conveyor is custom-designed by our engineers, precision-built by our fabricators, and rigorously tested for quality prior to dispatch.

Jarlam Conveyors

Jarlam designs and fabricates high-quality, customised conveyors to meet client requirements. Our conveyors are designed and built with precision, for durability, and hygienic performance, ensuring easy maintenance, longevity and compliance with foodgrade standards. Each conveyor undergoes rigorous quality testing prior to dispatch.

Our turnkey solutions, provides clients with the option to utilise Jarlam site teams for installation, ensuring a smooth implementation and optimal conveyor performance from day one.
