

FABRICATION & DESIGN

CAPABILITIES

JARLAM

Wide range of high quality custom stainless steel solutions

High-Quality

Leader in stainless steel fabrication for a diverse range of industrial sectors.

Areas of Expertise

For over 20 years, stainless steel fabrication has been at the forefront of Jarlam's operations. Our team are the best in the business and we provide high quality workmanship that is renowned throughout the following industries:

- **Food & Beverage Industry:** Best-practice designs, quality fabrication techniques, adherence to Australian Standards.
- **Industrial Industry:** Efficient and sustainable design solutions, fabrication techniques to ensure durability & adaptability.
- **Pharmaceutical Industry:** Expertise in chemical & mechanical stainless steel finishing techniques.
- **Mechanical Engineering:** Conceptual engineering, 3D design, compliance, safety, and technical documentation.

Fabrication Capabilities

Jarlam produces a wide range of high quality **custom stainless steel solutions**, including:

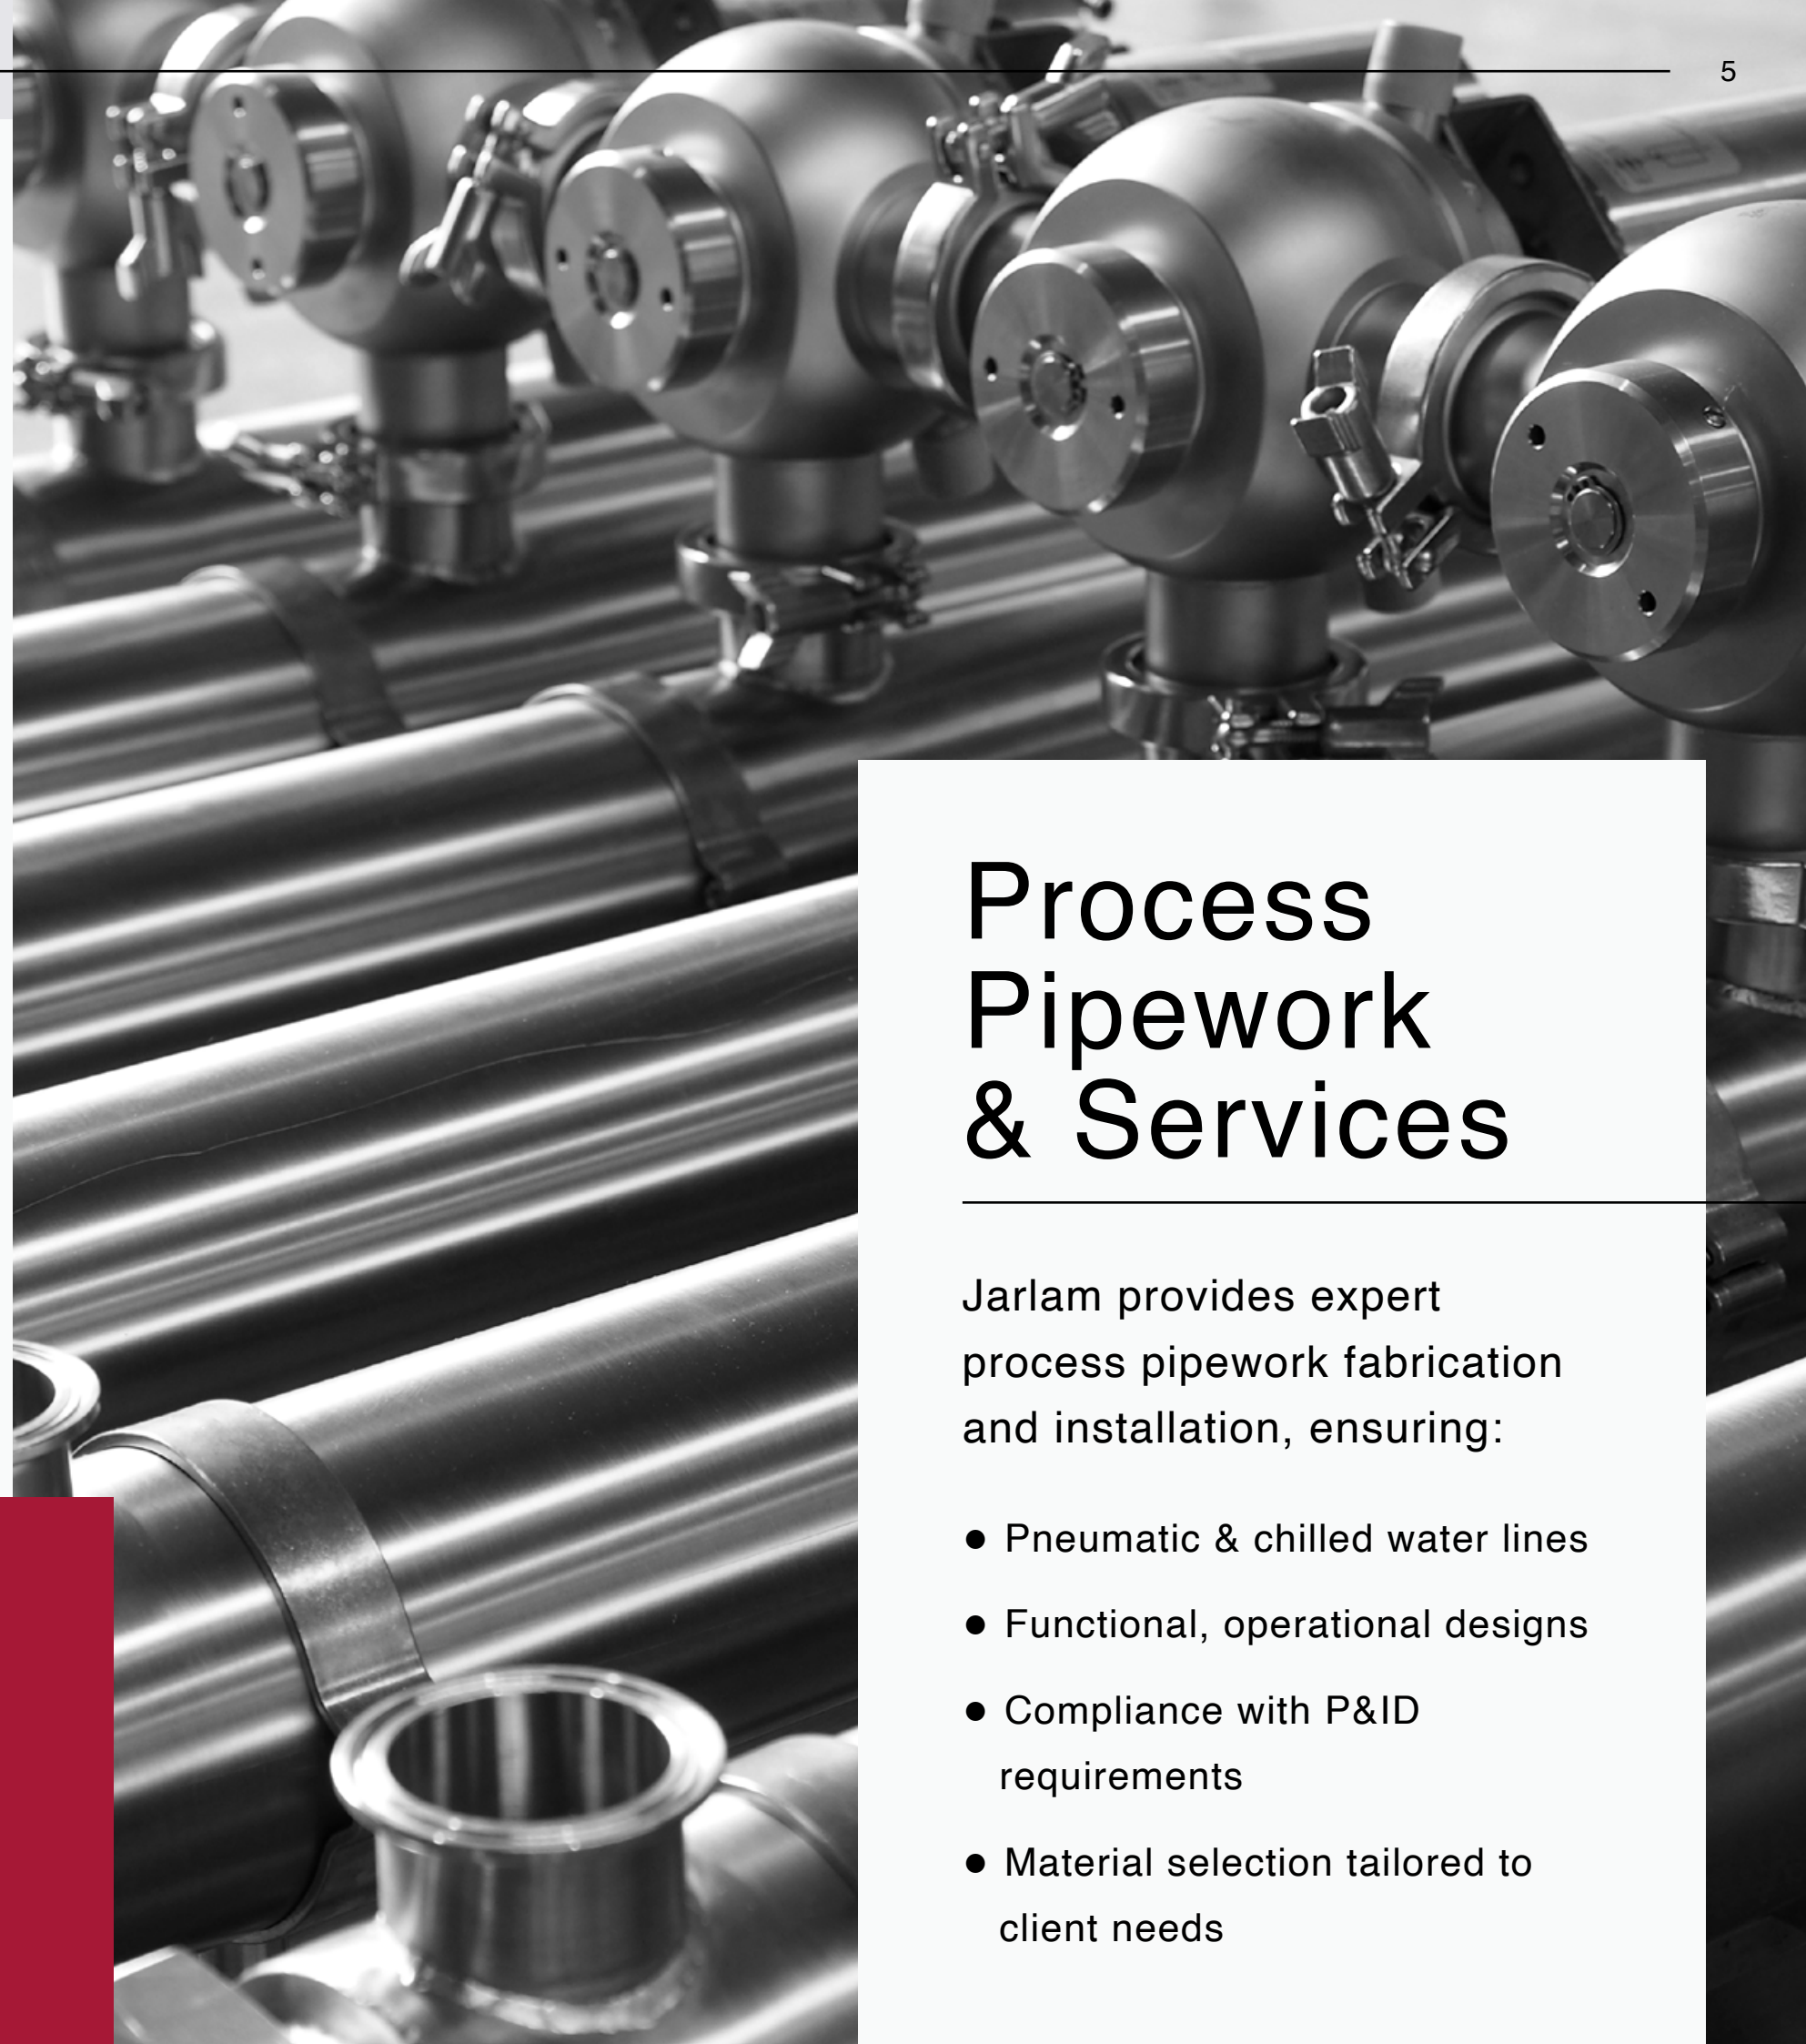

- Conveyors, platforms, and crossovers
- Custom production lines
- Safety guarding, hoppers, and tanks
- Hygienic trolleys, benches, and tables
- Lathe turning & milling
- Precision-machined components (95% of components machined in house)

We deliver custom stainless steel and pipework solutions with precision.

Process Pipework & Services

Jarlam provides expert process pipework fabrication and installation, ensuring:

- Pneumatic & chilled water lines
- Functional, operational designs
- Compliance with P&ID requirements
- Material selection tailored to client needs

Installation Services

Jarlam offers **turnkey equipment installations**, including:

- Project management
- Production line installations
- Fabrication & installation of droppers
- Commissioning support

Jarlam delivers quality, reliability, and industry-leading expertise for all engineering and fabrication needs.

With reliability, expertise, and high quality, Jarlam delivers outstanding installation services.

About Jarlam

Jarlam Australia is a Melbourne-based mechanical engineering and fabrication company with a 1000m² workshop and a team of 40+ full time team members, who have extensive experience supporting the food, pharmaceutical and packaging / recycling industries.

As leaders in the industry, Jarlam offers a diverse array of services ranging from engineering, design and drafting to the fabrication of custom stainless steel products. In addition to workshop services we specialise in equipment installation, asset relocations and all types of mechanical site works.

Our Commitment

Jarlam is committed to high quality workmanship, innovative design, and reliable lead times, with a rigorous quality assurance program to guarantee that every project meets or exceeds client expectations.
