

EQUIPMENT & MACHINERY INSTALLATION / RELOCATION

CAPABILITIES

Seamless machinery installation and relocation services

JARLAM

Turnkey Solutions

We offer turnkey solutions for both large and small projects, across Australia.

Area of Expertise

Jarlam specialises in the installation and relocation of equipment across Australia. As industry leaders in mechanical and electrical installations we offer turnkey solutions for both large and small-scale projects. Our capabilities include:

- **Project Management:** Strategic planning, resource allocation, and tracking.
- **Turnkey Projects:** End-to-end solutions, including electrical and vetted trades.
- **Qualified Tradespeople:** Skilled fitters, fabricators, and engineers with extensive experience in machinery / equipment installations.
- **Mechanical Engineering:** Drafting, schematics, line layouts, and modifications.
- **Equipment Supply:** Fully equipped site boxes with tested, operational tools.
- **Safety Commitment:** Strong focus on workplace health and compliance.

Equipment Installation & Relocations

Jarlam delivers seamless machinery installation and relocation services, working efficiently to meet tight deadlines and ensure minimal downtime.

Our Services

Installation: Project management, design, decrating, assembly, alignment, commissioning, process pipework, fabrication, and service line integration.

Relocation: Equipment disassembly/reassembly, factory modifications, layout adjustments, and site restoration.

Jarlam installs and relocates equipment efficiently, ensuring minimal downtime and disruption.
